

# MAIKO

Lolium perenne

## Profile

The late, diploid Perennial ryegrass MAIKO shows good yields and high rust resistance. At the same time, MAIKO is one of the few diploid varieties that is suitable for moorland due to its good persistence properties.

National listing/Official recommendation:  
DE, NL

- ✓ diploid variety with moor suitability
- ✓ great rust resistance
- ✓ well balanced yields over all cuts

## Yield characteristics

Dry matter yield total	<div><div></div><div></div><div></div><div></div><div>5</div><div></div><div></div><div></div><div></div></div>	medium
Dry matter yield - 1st cut	<div><div></div><div></div><div></div><div></div><div></div><div>6</div><div></div><div></div><div></div></div>	medium to high
Dry matter yield - further cuts	<div><div></div><div></div><div></div><div></div><div>5</div><div></div><div></div><div></div><div></div></div>	medium

## Plant stand development

Early growth development		low to medium
Susceptibility to winter damage		medium
Tendency to lodging		medium
Persistence		medium to high
Sward density		medium to dense

## Healthiness

Susceptibility to rust		low to medium
------------------------	--	---------------

## Quality

Inflorescence formation in aftermath		low
--------------------------------------	--	-----

Classification according to the descriptive variety list - Bundessortenamt (federal plant variety office, Germany) 2022 and our own results.
