

# LIDELTA

Lolium perenne

## Profile

LIDELTA is a tetraploid Perennial ryegrass of an early to intermediate maturity with high yields in total dry matter and dry matter first cut. This variety connects the high yields with good ratings in persistence and winter hardiness. Due to its high endurance, the yield potential of the variety can be exploited over a long period of time.

National listing/Official recommendation:  
DE

- ✓ outstanding dry matter yields
- ✓ great endurance for durable yield potential
- ✓ winterhardy

## Suitability

Ploidy	tetraploid
Maturity	early to inter

## Yield characteristics

Dry matter yield total		medium to high
Dry matter yield - 1st cut		medium to high
Dry matter yield - further cuts		medium

## Plant stand development

Early growth development		medium to strong
Susceptibility to winter damage		low to medium
Tendency to lodging		medium to strong
Persistence		high
Sward density		medium

## Healthiness

Susceptibility to rust		medium to strong
------------------------	--	------------------

## Quality

Inflorescence formation in aftermath		low to medium
--------------------------------------	--	---------------

Classification according to the descriptive variety list - Bundessortenamt (federal plant variety office, Germany) 2022 and our own results.

All specified informations, recommendations and representations mentioned here are made to the best of our knowledge and belief, but without guarantee of completeness or accuracy. We cannot guarantee that the properties described are repeatable. All information is provided as an aid to decision-making. Deutsche Saatveredelung AG excludes adhesion for damage or claims for damages, resulting of the use for the variety specified in this description. Mixture compositions may change if individual varieties are not available. As of 10/2022. Subject to change without notice.
