

ASTONHOCKEY

Lolium perenne

Profile

This tetraploid, intermediate perennial ryegrass shows good results for all main characteristics. It is a well-balanced and healthy variety with distinctly high endurance, which is why ASTONHOCKEY has the "M" for moor suitability. Resulting from this ASTONHOCKEY is especially suitable for peat soils and moist sites.

National listing/Official recommendation:
BE, DE

- ✓ very high persistence
- ✓ balanced and healthy variety
- ✓ secured yield distribution

Suitability

Ploidy	tetraploid
Maturity	inter
Peat-soil suitability	✓

Yield characteristics

Dry matter yield total		medium to high
Dry matter yield - 1st cut		medium to high
Dry matter yield - further cuts		medium to high

Plant stand development

Early growth development		medium to strong
Susceptibility to winter damage		low to medium
Tendency to lodging		medium
Persistence		high
Sward density		medium

Healthiness

Susceptibility to rust		medium
------------------------	--	--------

Quality

Inflorescence formation in aftermath		low to medium
--------------------------------------	--	---------------

Classification according to the descriptive variety list - Bundessortenamt (federal plant variety office, Germany) 2022 and our own results.

All specified informations, recommendations and representations mentioned here are made to the best of our knowledge and belief, but without guarantee of completeness or accuracy. We cannot guarantee that the properties described are repeatable. All information is provided as an aid to decision-making. Deutsche Saatveredelung AG excludes adhesion for damage or claims for damages, resulting of the use for the variety specified in this description. Mixture compositions may change if individual varieties are not available. As of 10/2022. Subject to change without notice.
