

LIHEROLD

Festuca pratensis

Profile

LIHEROLD is a very impressive, persistent and healthy Meadow fescue variety. Its advantages are the dry matter production at the beginning of plant development and in the yield in the first cut. LIHEROLD also achieved best marks in the important characteristics yield at regrowth, persistence, winter hardiness, tolerance to rust and total dry matter yield. Due to these characters LIHEROLD belongs to the best varieties in the German and European portfolio of Meadow fescues.

National listing/Official recommendation:

BY, DE, KZ, LU, NO, RU, UA, UK

- ✓ strong early growth development
- ✓ very high-yielding, winter-hardy and perennial variety
- ✓ outstanding sward density

Suitability

Ploidy	diploid
Maturity	early

Yield characteristics

Dry matter yield total		medium to high
Dry matter yield - 1st cut		medium to high
Dry matter yield - further cuts		medium

Plant stand development

Early growth development		strong
Susceptibility to winter damage		low to medium
Persistence		medium to high
Sward density		dense

Healthiness

Susceptibility to rust		low to medium
