

TERRALIFE® - BETAMAXX 50

The cover crop mix for sugar beet cultivation

Profile

TerraLife® BetaMaxx 50 creates the ideal preconditions for successful sugar beet cultivation. The mix includes deep-rooting species, that create deep channels allowing an easy root penetration for the following beets. This helps the beets to overcome dry periods. TerraLife® BetaMaxx allows beet cultivation per reduced tillage or no-till management.

TerraLife® BetaMaxx is unsuitable for the biological control of *Heterodera schachtii* (in this case, we refer to TerraLife® BetaSola).
