

BEEHAPPY

Makes bees happy

Phacelia

Profile

The phacelia variety BEEHAPPY is a late flowering type with very good standing ability. It offers fast juvenile development and therefore high intensity of shadowing. BEEHAPPY spreads very quickly across the ground and restricts the growth of weeds. Phacelia has an extensive root system with a large portion of fine roots and is therefore able to reach nutrients in deep soil layers.

- ✓ Late flowering type with very good standing ability
- ✓ Fast early growth leads to fast soil covering associated with good weed suppression
- ✓ The extensive root system with a large portion of fine roots enables to reach nutrients in deep soil layers

General

Green fertilizer

Summer intercrop
