

FLYNT

Remain flexible in your crop rotation

ca. S 110 | ca. K 130

Profile

FLYNT is the new ultra-early silage maize. Additionally, FLYNT can also be used as grain maize. Field trials in Germany reached grain yields of 6,8 tons per hectare. Due to a high proportion of flint genetics and quick youth development, the maize can be flexible into different crop rotations.

- ✓ Quick youth development
- ✓ High starch content
- ✓ Suitable for early and late sowing

General

Usage	  
Silo maturity	ultra early
Grain maturity	ultra early
Maturity forage	ca. 110
Maturity grain	ca. 130
Type of grain	flint
Hybrid	Three-way cross
