

NEGEV

The Newcomer in the Hard fescues!

Festuca trachyphylla

Profile

The NEGEV variety is very dense growing and forms a very fine scar. It is a very early maturing *Festuca trachyphylla* variety. Due to early growth start, NEGEV has the ability to close the scar faster than other varieties at the beginning of vegetation.

With limited resilience but long stamina in occasional drought and heat, Negev is one of the best varieties of its kind.

- ✓ Very dense
- ✓ Early ear emergence
- ✓ Low water and nutrient requirements
